**CELLULAR AND MOLECULAR BIOLOGY OF
HORMONE- AND NEUROTRANSMITTER-
CONTAINING SECRETORY VESICLES^a**

Editor and Conference Chair
ROBERT G. JOHNSON, JR.

Scientific Advisory Board
JULIUS AXELROD, EDWARD HERBERT, REGIS B. KELLY, JOSEPH B. MARTIN,
JOHN T. POTTS, JR., and HANS WINKLER

CONTENTS

Preface. By ROBERT G. JOHNSON, JR.	xiii
Opening Remarks. By BERTA SCHARRER	1

Part I. Biogenesis, Plasticity, and Cell Biology of Secretory Vesicles

The Life Cycle of Catecholamine-storing Vesicles. By HANS WINKLER, MARTINA SIETZEN, and MARIA SCHÖBER.....	3
The Molecular Basis of Phenotypic Choices in the Sympathoadrenal Lineage. By PAUL H. PATTERSON.....	20
The Chromaffin Granule: A Model System for the Study of Hormones and Neurotransmitters. By JOHN H. PHILLIPS and JAMES G. PRYDE.....	27
Preproparathyroid Hormone: A Model for Analyzing the Secretory Pathway. By KRISTINE M. WIREN, MASON W. FREEMAN, JOHN T. POTTS, JR., and HENRY M. KRONENBERG.....	43
Factors Controlling Packaging of Peptide Hormones into Secretory Granules. By HSIAO-PING H. MOORE.....	50

Poster Papers

Sidedness of the Major Membrane Proteins of Brain Synaptic Vesicles. By ERIK FLOOR	62
Hormonal Induction of a Heterogeneous Population of Storage Granules in GH ₄ C ₁ Pituitary Tumor Cells. By JONATHAN G. SCAMMELL, THOMAS G. BURRAGE, and PRISCILLA S. DANNIES	66

^aThis volume is the result of the Conference on the Cellular and Molecular Biology of Hormone and Neurotransmitter Containing Secretory Vesicles, which was held by the New York Academy of Sciences on June 16-18, 1986, in New York, N. Y.

Somatostatin Is Targeted to Gonadotrophic Secretory Granules in Transgenic Mice Expressing a Metallothionein-Somatostatin Fusion Gene. <i>By</i> PHILIP J. STORK, MICHAEL J. WARHOL, MALCOLM J. LOW, and RICHARD H. GOODMAN.....	70
Packaging of Pituitary Hormones: New Insights. <i>By</i> A. ZANINI, G. FUMAGALLI, P. ROSA, M. G. COZZI, and W. B. HUTTNER	74

Part II. Structure and Composition of Secretory Vesicles

Cholinergic Synaptic Vesicles from the Electromotor Nerve Terminals of <i>Torpedo</i> : Composition and Life Cycle. <i>By</i> V. P. WHITTAKER.....	77
Lipid Composition and Orientation in Secretory Vesicles. <i>By</i> EDWARD W. WESTHEAD.....	92
Secretory Vesicle Cytochrome b_{561} : A Transmembrane Electron Transporter. <i>By</i> PATRICK J. FLEMING and UTE M. KENT.....	101
Mechanism of Ascorbic Acid Regeneration Mediated by Cytochrome b_{561} . <i>By</i> DAVID NJUS, PATRICK M. KELLEY, GORDON J. HARNADEK, and YVONNE VIVAR PACQUING	108
Chromogranins A, B, and C: Widespread Constituents of Secretory Vesicles. <i>By</i> R. FISCHER-COLBRIE, C. HAGN, and M. SCHÖBER.....	120

Poster Papers

Presence of a Neuropeptide in a Model Cholinergic System. <i>By</i> DENES V. AGOSTON and J. MICHAEL CONLON	135
Antibodies to a Synthetic Peptide, Chromogranin ₁₋₁₄ . <i>By</i> RUTH HOGUE ANGELETTI, MARY BILDERBACK, and JIANG QIAN	138
Kinetics of Ferricyanide Reduction by Ascorbate-loaded Chromaffin-Vesicle Ghosts. <i>By</i> PATRICK M. KELLEY, YVONNE VIVAR PACQUING, and DAVID NJUS.....	141
Identification of a Synaptic Vesicle Specific Protein in <i>Torpedo</i> and Rat. <i>By</i> GUNNAR INGI KRISTJANSSON, JOHN H. WALKER, and HERBERT STADLER	145
Ascorbic Acid Enhancement of Norepinephrine Biosynthesis in Chromaffin Cells and Chromaffin Vesicles. <i>By</i> MARK LEVINE ..	147
Characterization of a Presynaptic Membrane Protein Ensuring a Calcium-Dependent Acetylcholine Release. <i>By</i> NICOLAS MOREL, MAURICE ISRAEL, BERNARD LESBATS, SERGE BIRMAN, and ROBERT MANARANCHE	151
Localization of Cytochrome b_{561} in Neuroendocrine Tissues That Contain Amidated Neuropeptides. <i>By</i> REBECCA M. PRUSS	155

Cholinergic Synaptic Vesicles Isolated from Motor Nerve Terminals from Electric Fishes to Rat: Molecular Composition and Functional Properties. <i>By</i> WALTER VOLKNANDT and HERBERT ZIMMERMANN	159
---	-----

Part III. Bioenergetics and Pharmacology of Neurotransmitter and Hormone Transport

Proton Pumps and Chemiosmotic Coupling as a Generalized Mechanism for Neurotransmitter and Hormone Transport. <i>By</i> ROBERT G. JOHNSON, JR.	162
The H ⁺ -Translocating ATPase of Chromaffin Granule Membranes. <i>By</i> DAVID K. APPS and JUDITH M. PERCY.....	178
The Amine Transporter from Bovine Chromaffin Granules: Photolabeling and Partial Purification. <i>By</i> S. SCHULDINER, R. GABIZON, Y. STERN, and R. SUCHI	189
Molecular Pharmacology of the Monoamine Transporter of the Chromaffin Granule Membrane. <i>By</i> JEAN-PIERRE HENRY, BRUNO GASNIER, MARIE-PAULE ROISIN, MARIE-FRANÇOISE ISAMBERT, and DANIEL SCHERMAN	194
Chromaffin Vesicle Function in Intact Cells. <i>By</i> NORMAN KIRSHNER, JAMES J. CORCORAN, BYRON CAUGHEY, and MIRA KORNER	207
Acetylcholine Transport: Fundamental Properties and Effects of Pharmacologic Agents. <i>By</i> STANLEY M. PARSONS, BEN A. BAHR, LAWRENCE M. GRACZ, ROSE KAUFMAN, WAYNE D. KORNREICH, LENA NILSSON, and GARY A. ROGERS	220
Enkephalin Uptake into Cholinergic Synaptic Vesicles and Nerve Terminals. <i>By</i> DANIEL A. MICHAELSON and DANIELA WIEN-NAOR.....	234
Composition and Transport Function of Membranes of Chromaffin Granules: Established Facts and Unresolved Topics. <i>By</i> H. WINKLER	252
The Vacuolar ATPase Is Responsible for Acidifying Secretory Organelles. <i>By</i> GARY RUDNICK	259
The Proton Pump of Synaptic Vesicles. <i>By</i> HERBERT STADLER	264

Poster Papers

Electrochemical Proton Gradients in Amine- and Peptide-containing Subcellular Organelles. <i>By</i> S. E. CARTY, R. G. JOHNSON, JR., and A. SCARPA.....	265
Molecular Weight and Hydrodynamic Properties of the Chromaffin Granule ATPase. <i>By</i> GARY E. DEAN, PAMLEA J. NELSON, WILLIAM S. AGNEW, and GARY RUDNICK.....	268

Increased cAMP or Ca^{2+} Second Messengers Reproduce Effects of Depolarization on Adrenal Enkephalin Pathways. <i>By</i> E. F. LA GAMMA, J. D. WHITE, J. G. MCKELVY, and I. B. BLACK	270
Neuronotrophic Activity in Adrenal Glands: Effect of Denervation. <i>By</i> JOSE R. NARANJO, BRADLEY C. WISE, ITALO MOCCHETTI, and ERMINIO COSTA	273
Increases in the Size of Acetylcholine Quanta Are Blocked by Treatment with AH5183. <i>By</i> WILLIAM VAN DER KLOOT	276

Part IV. Peptides and Processing within Secretory Vesicles

The Role of Secretory Granules in Peptide Biosynthesis. <i>By</i> RICHARD E. MAINS, EDWARD I. CULLEN, VICTOR MAY, and BETTY A. EIPPER	278
Peptide Precursor Processing Enzymes within Secretory Vesicles. <i>By</i> Y. PENG LOH	292
Regulation of Enkephalin, VIP, and Chromogranin Biosynthesis in Actively Secreting Chromaffin Cells: Multiple Strategies for Multiple Peptides. <i>By</i> JAMES A. WASCHEK, REBECCA M. PRUSS, RUTH E. SIEGEL, LEE E. EIDEN, MARIE-FRANCE BADER, and DOMINIQUE AUNIS	308
The Regulation of Enkephalin Levels in Adrenomedullary Cells and Its Relation to Chromaffin Vesicle Biogenesis and Functional Plasticity. <i>By</i> O. H. VIVEROS, E. J. DILIBERTO, JR., J.-H. HONG, J. S. KIZER, C. D. UNSWORTH, and T. KANAMATSU ...	324
Dopamine β -Hydroxylase: Biochemistry and Molecular Biology. <i>By</i> TONG H. JOH and ONYOU HWANG	342
Chromogranin A: The Primary Structure Deduced from cDNA Clones Reveals the Presence of Pairs of Basic Amino Acids. <i>By</i> MARK GRIMES, ANNA IACANGELO, LEE E. EIDEN, BRUCE GODFREY, and EDWARD HERBERT	351
How Sensitive and Specific Is Measurement of Plasma Chromogranin A for the Diagnosis of Neuroendocrine Neoplasia? <i>By</i> DANIEL T. O'CONNOR and LEONARD J. DEFTOS	379

Poster Papers

Transport of Ascorbic Acid into Pituitary Cultures. <i>By</i> E. I. CULLEN, V. MAY, and B. A. EIPPER	387
Molecular Biology of Carboxypeptidase E (Enkephalin Convertase), a Neuropeptide-synthesizing Enzyme. <i>By</i> L. D. FRICKER and E. HERBERT	391
Biosynthesis and Maturation of Carboxypeptidase H. <i>By</i> VIVIAN Y. H. HOOK, MIKLOS PALKOVITS, and HANS-URS AFFOLTER	394

The Secretogranins-Chromogranins: What Biochemistry, Cell Biology, and Molecular Biology Tell Us about Their Possible Functions. <i>By</i> W. B. HUTTNER, U. M. BENEDUM, A. HILLE, and P. ROSA.....	397
Chloroquine and Monensin Alter the Posttranslational Processing and Secretion of Dopamine β -Hydroxylase and Other Proteins from PC12 Cells. <i>By</i> ESTHER L. SABBAN, LORRAINE J. KUHN, and MAHESH SARMALKAR.....	399
IRCM-Serine Protease #1 from Pituitary and Heart: A Common Prohormone Maturation Enzyme. <i>By</i> NABIL G. SEIDAH, JAMES A. CROMLISH, G. THIBAUT, and M. CHRÉTIEN.....	403
Opioid Peptides of the Electric Ray <i>Narcine braziliensis</i> . <i>By</i> CHRISTOPHER D. UNSWORTH and ROBERT G. JOHNSON, JR. ...	406

Part V. Vesicle Movement and Secretion

Movements of Vesicles on Microtubules. <i>By</i> MICHAEL P. SHEETZ, RONALD VALE, BRUCE SCHNAPP, TRINA SCHROER, and THOMAS REESE	409
Calmodulin and the Secretory Vesicle. <i>By</i> JOSÉ-MARÍA TRIFARÓ and SUSAN FOURNIER	417
Tubulin- and Actin-binding Proteins in Chromaffin Cells. <i>By</i> DOMINIQUE AUNIS, MARIE-FRANCE BADER, O. KEITH LANGLEY, and DOMINIQUE PERRIN	435
Similarities and Differences among Neuroendocrine, Exocrine, and Endocytic Vesicles. <i>By</i> J. DAVID CASTLE, RICHARD S. CAMERON, PETER ARVAN, MARK VON ZASTROW, and GARY RUDNICK	448
Regulated Secretory Pathways of Neurons and Their Relation to the Regulated Secretory Pathway of Endocrine Cells. <i>By</i> PIETRO DE CAMILLI and FRANCESCA NAVONE.....	461
Ascorbic Acid Release from Adrenomedullary Chromaffin Cells: Characteristics and Subcellular Origin. <i>By</i> JANE KNOTH, O. HUMBERTO VIVEROS, and EMANUEL J. DILIBERTO, JR.	480

Poster Papers

Characterization of Calcium-Dependent Chromaffin Granule Binding Proteins. <i>By</i> CARL E. CREUTZ, WILLIAM H. MARTIN, WILLIAM J. ZAKS, DEBRA S. DRUST, and HELEN C. HAMMAN	489
SVP38: A Synaptic Vesicle Protein Whose Appearance Correlates Closely with Synaptogenesis in the Rat Nervous System. <i>By</i> STEPHEN H. DEVOTO and COLIN J. BARNSTABLE	493
Biochemical and Immunocytochemical Characterization of p38, an Integral Membrane Glycoprotein of Small Synaptic Vesicles. <i>By</i> R. JAHN, F. NAVONE, P. GREENGARD, and P. DE CAMILLI.....	497

Synaptophysin, an Integral Membrane Protein of Vesicles Present in Normal and Neoplastic Neuroendocrine Cells. <i>By</i> BERTRAM WIEDENMANN, HUBERT REHM, and WERNER W. FRANKE	500
---	-----

Part VI. Exocytosis from the Perspective of the Secretory Vesicle

Exocytosis from the Vesicle Viewpoint: An Overview. <i>By</i> D. E. KNIGHT and P. F. BAKER	504
Synexin and Chromaffin Granule Membrane Fusion: A Novel "Hydrophobic Bridge" Hypothesis for the Driving and Directing of the Fusion Process. <i>By</i> HARVEY B. POLLARD, EDUARDO ROJAS, and A. LEE BURNS	524
Are Changes in Intracellular Free Calcium Necessary for Regulating Secretion in Parathyroid Cells? <i>By</i> E. F. NEMETH and A. SCARPA	542
Inositol Phospholipid Turnover and Protein Phosphorylation in Secretory Responses. <i>By</i> MASAYOSHI GO, HIDEAKI NOMURA, TATSURO KITANO, JUNKO KOUMOTO, USHIO KIKKAWA, NAOAKI SAITO, CHIKAKO TANAKA, and YASUTOMI NISHIZUKA	552
An Integrated Approach to Secretion: Phosphorylation and Ca^{2+} -Dependent Binding of Proteins Associated with Chromaffin Granules. <i>By</i> MICHAEL J. GEISOW and ROBERT D. BURGOYNE	563

Poster Papers

Differential Role of Calcium in Stimulus-Secretion-Synthesis Coupling in Lactotrophs and Corticotrophs of Rat Anterior Pituitary. <i>By</i> JITENDRA R. DAVE, LEE E. EIDEN, DAVID LOZOVSKY, JAMES A. WASCHEK, and ROBERT L. ESKAY	577
Biochemical and Morphological Correlates of Thyroliberin Release in Hypothalamic Cell Cultures Grown in a Serum-Free Medium. <i>By</i> C. LOUDES, A. FAIVRE-BAUMAN, A. BARRET, R. PICART, and A. TIXIER-VIDAL	581
A Receptor for Extracellular Cations on Parathyroid Cells. <i>By</i> E. F. NEMETH	583
Concluding Remarks: Neuroendocrine Secretory Vesicles—No Longer a Black Box. <i>By</i> ROBERT G. JOHNSON, JR.	586
Index of Contributors	589
